**May 31, 2015**

**Dear Jack,**

**I wanted to reach out to you and let you know what a great piece of technology and software you have developed with Kachoolie. I have been using this product since 2014 and it has been instrumental in the day-to-day operation of our Citgo gas station. I am able to see real time gallons along with usage history to determine deliveries and high volume periods. This has also been very helpful to my supplier to efficiently monitor delivery requirements and not supply my station through crisis management. This product is a worthwhile investment for any station owner and or oil supplier in this time and age.**

**Thank you again for your wisdom in the development of this product to make our industry that much easier to manage.**

**Sincerely  
Harold Thomas  
President**
